

M Ibraheem Rehman Qazi

Forward Deployed Engineer | Java Backend, Cloud & Agentic AI

Islamabad, Pakistan (Open to Relocation) | +92 349 4578479 | ibraheemwork15@gmail.com

linkedin.com/in/ibraheem-rehman | github.com/ibraheem15

SUMMARY

Forward Deployed Engineer embedded with international clients (US and beyond), taking production-grade agentic AI systems from discovery to launch. Builds Java/Spring Boot backends and LLM guardrails for AI agents, deployed on GCP, AWS, and Kubernetes with Terraform. Works directly with client leadership across time zones to turn unclear requirements into reliable, secure systems. Open to relocation.

TECHNICAL SKILLS

Backend: Java, Spring Boot, Spring Security, Maven, C++, SQL, REST API Design, Microservices, Event-Driven Architecture, DDD, Hexagonal Architecture; Familiar: Python

Generative AI: LLM Integration, AI Agents, ReAct, Multi-Agent Systems, LangChain, LangGraph, RAG, Vector Search, MCP, LLM Guardrails & Evaluation, Transformers, Hugging Face, OpenAI API, Azure AI

Cloud & DevOps: GCP, AWS (EKS, EC2, S3, IAM, CloudWatch, CloudTrail), Azure, Railway, Kubernetes, Karpenter, Docker, Terraform (IaC), CI/CD (GitHub Actions, Jenkins)

Data & Frontend: PostgreSQL, MongoDB, React, Tailwind CSS

Client Delivery: Technical Discovery, Requirements Analysis, Solution Architecture, Stakeholder Management, Production Deployment

PROFESSIONAL EXPERIENCE

Vector

Sep 2025 – Present

Forward Deployed Engineer (Full Stack & AI)

Remote, international clients

- Embedded with a US-based client, owning discovery, solution design, build, and production rollout of agentic AI systems.
- Architected **Inhibitor**, a policy-driven guardrail for AI agents that evaluates evidenced conduct at every step of a **ReAct loop** (reasoning, requests, responses, decisions, and tool actions) and blocks policy violations before they run.
- Turned the client's safety and compliance rules into machine-enforceable policies: an auditable control layer between LLM agents and production systems.
- Load-tested the live Inhibitor API with burst traffic up to 200 concurrent users: **742/742 requests succeeded (100%)**, 0 malformed responses, and Performance-mode median latency held at about 2 s from 1 to 200 concurrent users.
- Deployed and operated services on **GCP** and Railway, provisioning cloud infrastructure as code with **Terraform**.
- For a second client's GenAI platform, deployed event-driven microservices on **AWS EKS** with Karpenter autoscaling to cut compute cost; kept 98% uptime with CloudWatch/CloudTrail observability and least-privilege IAM.
- Technical point of contact for client leadership and partner engineering teams: ran technical discovery, challenged unclear requirements, and fed field insights back into the product roadmap.

Hexler Tech

Jun 2025 – Aug 2025

Full Stack Engineer

Islamabad, Pakistan

- Built backend services for an incubator platform managing 100+ startups, including authentication and role-based access.
- Integrated third-party AI APIs into mobile features, including speech-to-text and LLM processing pipelines.

xFlow Research

Jun 2024 – Apr 2025

Software Engineer (Apprenticeship)

Islamabad, Pakistan

- Containerized backend systems with Docker, reducing deployment time by 40%.
- Contributed to telecom backend protocol implementations (SIP/RTP) supporting 100K+ users.

PROJECTS

BehaviourLens API | Java, Spring Boot, PostgreSQL, AWS S3, OpenAI, MCP github.com/ibraheem15/Behaviourlens-API

- AI backend for animal-behaviour video analysis built with DDD and hexagonal architecture: Spring Boot REST APIs with JWT auth, PostgreSQL, S3 video storage, OpenAI Vision, and domain features exposed as **MCP tools** for LLM agents.

E-commerce Platform | Java, Spring Boot, SQL, Docker, AWS, React github.com/ibraheem15/Ecommerce-B-JAVA-SQL

- Full-stack e-commerce platform serving 5K+ users/month, containerized with Docker and deployed on AWS.

EDUCATION & CERTIFICATIONS

National University of Computer and Emerging Sciences (FAST-NUCES)

2021 – 2025

Bachelor of Science in Software Engineering

Islamabad, Pakistan

Coursework: Software Architecture, DevOps, MLOps, Data Structures, OOP, Software Quality

Certification: AWS Certified Cloud Practitioner (Amazon Web Services)

Leadership: Coordinator, NASCON 2023 (200+ participants); Member, IEEE FAST; Member, FAST Data Science Society
